The terminal at the bottom shows the server running at port 5000 and the database connected successfully.

Post /register (password is hashed in response for security (ideally we won't send password))

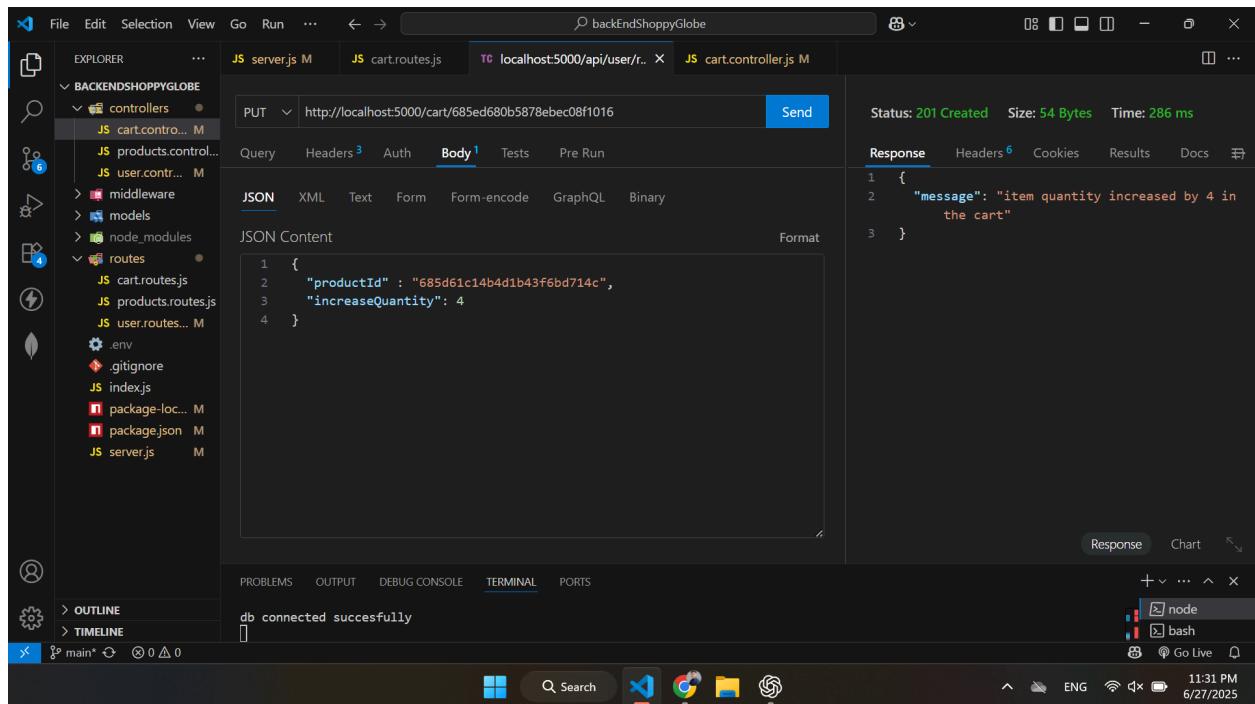

Post /login (user is logged in. The jwt token received in response can be seen)

Post /cart (we have used dynamic routing to pass user id, since rubrics is not clear about this)

Put /cart (quantity is increased by the amount sent by the client)

Delete /cart (product is deleted from the cart)
